1 Requirements

This document details all the steps required to deploy the CTX-IMAP-Extensions module.

Requirements:

- Minimum Cortex v6.5 installed on the Cortex Application Server
- Windows PowerShell v5 or newer

2 Setup

1. Import CTX-IMAP-Extensions studio package and ensure that the relevant users have the required permissions in Studio Authorisation
2. Move the 'IMAP Provider' folder, downloaded from the GitHub repository, into a directory on the Cortex application server which the current user has read rights to
